

eQuip **Total**

RFID Asset & Product Lifecycle Management Solutions

Mobile Apps, Durable RFID, Powerful Cloud Database

Offshore Activities

Distribution

Onshore Activities

Our secure, cloud-based software solution gives you the ability to maintain positive control of your assets throughout their lifecycle. Easily track, inspect and procure assets while maintaining compliance standards, maximizing efficiencies and reducing operating risk. eQuip is designed to work where you do, in the most demanding of environments the world has to offer. When paired with our rugged hardware and tagging solutions, you always know:

What is it? Where is it? Is it safe to use?

MANUFACTURING

eMpower

- Product-specific documentation to distributors
- Authenticate assets, prevent counterfeiting/theft
- Cloud-based documentation management for you AND your customers

eValueate

- Positive control of the distribution chain
- Monitor product performance in the field
- Track product lifecycles, identify market trends

eEfficiency

- Streamlined transfer of records & documents
- Track and manage complex assemblies using sub-assemblies (Parent/Child)
- Speed up the manufacturing process

eXamination

- Track product quality checks, monitor preventative maintenance
- Mitigate risk (product recall), improve traceability

DISTRIBUTION & SUPPLY CHAIN

eMpower

- Build data books with a click of a button
- Put asset and product-specific documentation at your customers' fingertips
- Add value to the OEM merchandise

eValueate

- Maintain visibility of the product beyond integration
- Track and manage complex assemblies using sub-assemblies (Parent/Child)

eEfficiency

- RFID-enabled inventory reduces receiving and data entry costs, helps eliminate paperwork
- Real-time access to all manufacturer documentation

eXamination

- Track product warranty status
- Mitigate risk, inhibit counterfeiting
- Provide inspection and preventative maintenance documentation

Where do you fit in?

OWNER/OPERATOR

eMpower

- Real-time, on-the-job access to documentation
- Easily transfer asset documentation (i.e., well completion through production)
- Manage Cap Ex more effectively

eValueate

- Monitor asset utilization, set automated re-order points
- Track product lifecycles, anticipate and mitigate end-of-life events

eEfficiency

- Maximize asset utilization
- Eliminate paper, dramatically reduce data entry costs
- Decrease turnaround times during shutdown

eXamination

- Have access to the history of events associated with your asset (certifications, modifications, inspections, service dates, etc.) and all of the related documentation, from start to scrap

SERVICE & INSPECTIONS

eMpower

- Inspection results available to customer immediately
- Bring eyes in the office to the field using photos
- Access the proper repair manual for the job

eValueate

- Analyze inspection times/locations, manage resources

eEfficiency

- Automated, interactive inspections replace pen & paper, scanned or uploaded forms
- Real-time, all-the-time availability of records and documents – from manufacturing to the Inspector
- Increase utilization of labor dollars by maximizing time and efficiency in the field
- Analyze field assets to proactively acquire replacements

eXamination

- Dashboard provides a powerful overview of your assets
- Eliminate inspection mistakes through electronic identification of each asset and electronic recording of results

Our solutions enable the consumer to have their energy requirements met safely and economically.
